ABOUT US

OLYMPIA TRANSPORT EFFICIENT. RELIABLE. SCALABLE.

For over 20 years, Olympia Transportation has been a trusted leader in transportation, logistics, and supply chain solutions across Canada and beyond. We specialize in global logistics, warehousing, co-packing, and seamless import/export operations, ensuring cost-effective and timely deliveries.

As the leading transporter in the Canadian pulp industry, we command 80% of the market and continue to expand our warehousing and transport network nationwide. As a key player in Canadian imports, we specialize in high-volume drayage pickups at ports, moving up to 300 containers daily to ensure seamless supply chain flow.

With a focus on precision scheduling, route optimization, and streamlined warehouse operations, Olympia Transportation delivers scalable logistics solutions that **drive business success.**

OUR SERVICES

TRANSPORT FTL/LTL

At Olympia Transportation, we provide Full Truckload (FTL) and Less Than Truckload (LTL) shipping to ensure efficient and reliable freight solutions. FTL is ideal for large shipments that require an entire truck, offering faster transit times and minimal handling for maximum security. LTL is a cost-effective option for smaller shipments, allowing businesses to share truck space while maintaining dependable delivery. Our commitment to efficiency and customer satisfaction ensures that your freight moves safely, on time, and with tailored solutions to meet your business needs.

CONTAINER DRAYAGE

We specialize in container drayage services, ensuring efficient movement of your containers between ports, rail yards, and warehouses. Our experienced team handles everything from container pickup to timely delivery, helping businesses avoid port congestion and costly delays. Whether it's import or export freight, Olympia ensures a smooth transition through the supply chain.

TRANSLOADING & CROSS-DOCKING

Speed up your supply chain with our transloading and cross-docking services. By transferring goods directly between transport modes, we help reduce storage time and optimize distribution. Our cross-docking solutions minimize handling and improve delivery speed, making them ideal for businesses needing quick inventory turnaround.

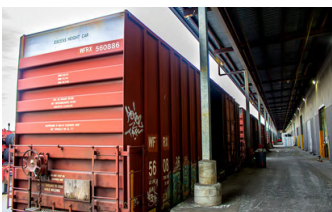

COURIER LAST-MILE & TIME-SENSITIVE DELIVERIES

We provide fast and reliable courier solutions for last-mile delivery, e-commerce fulfillment, and time-sensitive shipments. Whether local or nationwide, our courier network ensures your packages reach their destination on time.

INTERMODAL TRANSPORT

We optimize freight movement using a combination of road, rail, air, and sea transport, offering cost-effective and sustainable shipping solutions. Our intermodal services enhance efficiency while reducing environmental impact.

RAIL SIDING FREIGHT HANDLING

Our dedicated rail siding solutions enable direct rail freight loading and unloading, improving transportation efficiency and reducing reliance on road freight. This service ensures cost savings and streamlined logistics operations.

TEMPERATURE CONTROLLED

Our fleet of refrigerated and climate-controlled vehicles ensures the safe transportation of perishable goods, pharmaceuticals, and sensitive products, maintaining optimal temperature conditions throughout transit.

OVERDIMENSIONAL FLAT DECK & HEAVY HAUL

We provide over-dimensional transport for oversized freight, ensuring compliance with permits and regulations. Our flat deck transportation fleet—featuring flat deck, step-deck, and double-drop trailers—securely moves steel, lumber, and large equipment. For heavy haul, we utilize specialized trailers to handle extreme weights, with expert routing and permitting for safe, efficient delivery.

3PL WAREHOUSING

Olympia provides third-party logistics (3PL) warehousing solutions, offering secure storage, inventory management, and order fulfillment. Our strategically located warehouses ensure fast distribution and streamlined logistics. Whether you need short-term storage, pick-and-pack services, or full-scale supply chain management, we deliver cost-effective and scalable solutions tailored to your business needs.

REFRIGERATED WAREHOUSING

With state-of-the-art cold storage facilities, we offer temperature-controlled warehousing for frozen, chilled, and perishable products. Our monitored environments ensure compliance with food safety and quality standards.

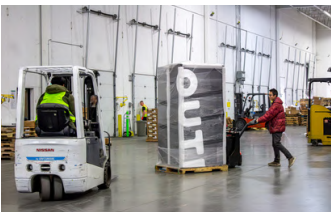

REVERSE LOGISTICS

We manage product returns, refurbishments, recycling, and disposal processes efficiently, helping businesses minimize waste and maximize asset recovery while enhancing customer satisfaction.

FULFILLMENT WAREHOUSE

Our team manages inventory storage, order picking, packing, and shipping with precision and efficiency. Whether you're handling e-commerce, retail, or wholesale shipments, we ensure accurate and timely deliveries. With real-time inventory tracking and scalable solutions, Olympia helps businesses reduce operational costs and improve customer satisfaction. From receiving goods to final delivery, we handle the logistics, so you can focus on growing your business.

CO-PACKING SERVICES

We offer copacking services to help businesses efficiently package and distribute their products. Our team handles labeling, repackaging, bundling, and custom packaging solutions, ensuring your products are retail-ready and meet industry standards. Whether you need product kitting, shrink-wrapping, or private-label packaging, Olympia provides scalable and cost-effective solutions. With quality control at every step, we help brands streamline operations, reduce costs, and enhance market presentation. Let us take care of the packing, so you can focus on growing your business.

CUSTOMS BROKERAGE SERVICES

Olympia Transportation provides expert customs brokerage services, ensuring smooth and compliant import and export processes. Our team navigates regulatory requirements, documentation, and clearance procedures to minimize delays and keep your supply chain moving efficiently.

FREIGHT FORWARDING

Reliable and efficient freight forwarding services designed to streamline end-to-end logistics. With expertise in multi-modal transportation, customs clearance, and global coordination, we ensure seamless, cost-effective, and timely deliveries worldwide.

OUR ASSETS

At Olympia Transportation, our extensive fleet and infrastructure enable us to meet all your logistics needs with precision and efficiency. As an asset-based carrier, we maintain full control over our equipment, ensuring consistent, high-quality service. This ownership model allows us to quickly adapt to challenges, proactively resolve issues, and minimize disruptions to your supply chain.

105 Trucks

Our 105-truck fleet features GPS tracking and safety technology, ensuring timely, fuel-efficient, and reliable deliveries for FTL, LTL, temperature-controlled, and specialized freight across all distances.

400+ Chassis

With 400+ chassis, we offer flexible, scalable container transport for intermodal, port drayage, and cross-border shipments, ensuring secure, efficient movement across ports, rail yards, and distribution centers.

60+ Dry Vans

Our 60+ dry vans provide secure, weather-protected transport for cargo, retail, and industrial goods, ensuring safe, on-time deliveries all across the lower mainland.

2 Food Grade Warehouses

We operate two food-grade warehouses spanning **180,000+ sq. ft.**, designed for perishable and temperature-sensitive goods while ensuring strict food safety compliance. Our climate-controlled storage supports the grocery, beverage, pharmaceutical, and agriculture industries.

2 Pulp Paper Warehouses

Our **230,000+ sq. ft.** pulp and paper warehouses are designed for efficient storage, handling, and distribution of paper products, packaging materials, and raw pulp. With optimized inventory systems and environmental controls, we minimize waste, reduce handling time, and ensure product integrity.

2 Industrial Grade Warehouses

Spanning over **230,000+ sq. ft.** of industrial grade warehouses, they are designed for high-volume storage, distribution, and co-packing. Strategically located with seamless access to major transport hubs, our facilities offer secure, efficient, and scalable solutions to keep supply chains moving.

- ▶ **GEOTAB** We utilize Geotab’s advanced telematics to provide real-time GPS tracking, vehicle diagnostics, and driver behavior monitoring. This technology ensures operational efficiency, enhances safety, and reduces costs across our fleet.
- ▶ **CAMELOT** With Camelot’s supply chain solutions, we optimize logistics planning and execution. From demand forecasting to route optimization, Camelot empowers us to deliver smarter, faster, and more reliable services to our clients.
- ▶ **AUTOMATED FREIGHT MATCHING** AFM streamlines the matching of available freight with the right carriers. This advanced platform helps us minimize empty miles, reduce costs, and ensure timely pickups and deliveries.
- ▶ **LOADLINK** As a member of Canada’s largest freight-matching network, Loadlink connects us to a vast pool of shippers and carriers. This ensures we can handle even the most complex logistics needs with speed and efficiency.
- ▶ **TRINIUM TECH** Tritium Tech empowers us with advanced analytics and AI-driven insights to optimize every aspect of our logistics operations. From predictive maintenance to demand forecasting, this cutting-edge platform enhances efficiency, reduces costs, and ensures unparalleled reliability.
- ▶ **LOGISTICS INFORMATION MANAGEMENT SYSTEMS** Our proprietary L.I.M.S. platform centralizes data and streamlines communication between clients, carriers, and our team. This system provides complete visibility into shipment status, enabling proactive issue resolution and superior customer service.
